- Project 1: Online Shopping Management System
- Project 2: Battery Management System for Electric Vehicles.
- Project 3: Home Automation System
- Internship 1: 5 day internship at Malabar Cements Ltd, Palakad.
- Automation testing program(online)- Novel Vista

Certifications

- Internship 1: Electrical Autocad
- Internship 2: Automation testing program(online)- Novel Vista

Professional Summary

I am a highly motivated and enthusiastic software developer who has completed training in full-stack development with a focus on C#.NET. My skill set includes proficiency in C#.NET, Web API, React, Microservices, Microsoft Azure cloud, SQL, HTML, and CSS. I have practical experience in application development using C#.NET and related frameworks, such as API, as well as front-end development with React. As a recent graduate entering the field, I am eager to apply my knowledge and adaptability to make a positive impact in the world of software development.

Academic Profile (Highest Qualification)

Qualification: Bachelor Of Technology

Stream: Electrical And Electronics Engineering

College Name: Sahrdaya College Of Engineering And Technology ,Kodakara, Kerala.

CGPA: 7.47

Work experience (if any)

During a 6-month training program, I gained expertise in Dot NET full-stack development, mastering a range of technologies including Dot NET, MS SQL, C Sharp, React, Microservices, and Microsoft Azure cloud. I had the opportunity to apply my skills and knowledge in a practical setting through a capstone project where I developed a web application. This experience enhanced my proficiency in full stack development, strengthened my problem-solving abilities and fostered effective teamwork and collaboration.
